Department Description

Atradius IT Services (ITS) is part of the Atradius Group and is responsible for all worldwide ICT services for Atradius. ITS is a global operation with staff in 12 countries driving digital transformation and a wide range of services, projects, vendors, and outsourcing.

Within ITS, the Power Platform CoE at Atradius drives the adoption and governance of low-code technologies, enabling scalable automation and rapid solution delivery across the organization. The team combines expertise in Power Platform, artificial intelligence, and best practices to empower business units to build secure, efficient, and business-aligned applications.

If you are committed to staying on the cutting edge of automation to transform ideas into practical solutions, you are in the right place!

Job Description

We are seeking a passionate and experienced **Senior Power Platform Engineer** to join our dynamic team. In this pivotal role, you will be instrumental in the design, development, and deployment of innovative solutions leveraging the full capabilities of Microsoft Power Platform, which includes Power Apps, Power Automate, Power BI, and Copilot Agents. You will have the opportunity to work on a variety of challenging projects that address complex business problems and drive significant improvements in operational efficiency.

As a Senior Power Platform Engineer, you will play a critical role in understanding the unique needs of our business and translating those needs into robust, scalable, and user-friendly solutions. Your deep technical expertise and strategic vision will enable you to craft applications and workflows that enhance productivity, streamline processes, and provide actionable insights through data visualization.

You will collaborate closely with cross-functional teams, including business analysts, project managers, IT professionals, and end-users, to ensure that the solutions you develop meet the highest standards of quality and functionality. Additionally, you will act as a mentor and advisor to junior team members, sharing your knowledge and expertise to help elevate the overall skill set of the team.

In this role, you will also be responsible for staying abreast of the latest advancements in Power Platform technologies and best practices. You will continuously explore new features and functionalities, ensuring that our solutions remain at the forefront of technological innovation. By doing so, you will help to maintain our competitive edge and support the ongoing digital transformation of our organization.

If you are a technology enthusiast excited about transforming business processes through innovative Power Platform solutions, we want to meet you!

Responsibilities:

Design and Development:

- Design, develop, and maintain custom applications using Power Apps.
- Create automated workflows with Power Automate.
- Develop interactive dashboards and advanced reports in Power BI.
- Implement intelligent chatbots and customer service solutions with Power Virtual Agents.

Collaboration and Consulting:

- Collaborate with business and IT teams to understand requirements and propose efficient solutions.
- Act as an internal consultant for best practices in Power Platform utilization.
- Provide technical support and guidance to other team members and end users.

Optimization and Improvement:

- Identify continuous improvement and process optimization opportunities.
- Ensure the quality and scalability of developed solutions.
- Implement and manage integrations with other Microsoft and third-party systems and services.

Training and Documentation:

- Develop and conduct training sessions for end users and internal teams.
- Document processes, designs, and implementation procedures clearly and in detail.

Qualifications:

- Bachelor's or master's degree in computer science, Information Technology, or a related field.
- Minimum of 3 years of experience in developing and managing solutions using Microsoft Power Platform.
- Great interpersonal skills and a keen inclination toward collaborative teamwork.
- Proficiency in Power Apps, Power Automate, Power BI, and Power Virtual Agents.
- Experience with Microsoft 365 and Azure services.
- Proficiency in RAD tools, such as low-code platforms, and experience with Agile methodologies.
- Excellent problem-solving and analytical skills.

What do we offer?

- A dynamic, international, and challenging work environment
- Training and support to reach your full potential including the opportunity for continuous professional development.
- Attractive terms and conditions, including competitive salary, pension package and a range of flexible benefits and rewards.

Challenging tasks with individual development and training opportunities

Equal opportunities for all

The success of our organisation stands with the quality of our people and the ideas they have. Insights and innovative solutions for our customers are the result of an interplay of cultures, knowledge and experience. That is why diversity is extremely important to Atradius. To ensure that all colleagues within Atradius can develop their qualities, we promote an inclusive culture in which everyone feels involved and valued. We encourage and welcome everyone to apply to our positions.
