

Data Platform Engineer

Atradius

The Atradius Group provides trade credit insurance, surety and collections services worldwide, and has a presence through 160 offices in 52 countries. The products offered by Atradius protect companies around the world against the default risks associated with selling goods and services on credit.

At Atradius, we believe in personal development and the Growth Mindset. Our Culture is based on teamwork, reliable accountability, constantly improving and unrivalled service. Read on more on our Career site: <https://careers.atradius.com/en/careers>.

Department Description:

Within Atradius ITS, the Data Platform team is responsible for creating the core capabilities related to Data Engineering, Data Science and Business intelligence. This includes data processing, predictive modelling and reporting solutions. The team has a strong product mindset and develops the platform as such.

Responsibilities:

We are looking for a Senior Engineer to join our international, multidisciplinary team within the Data Platform / Cloud Engineering domain. You will be responsible for improving and maintaining the platform's features, scalability, availability and ease of use along with automating processes within the platform. We mainly use Azure native tooling (Azure DevOps, Azure Databricks) along with open source technologies / tooling (Terraform, Python) to achieve this. We have a great, collaborative team where answers can be found quickly and solutions can be developed in close collaboration.

Experience:

- 3+ Years of experience with the Azure stack (ARM, Databricks, Azure Monitor, Azure Log Analytics, Azure Virtual Machines)
- Extensive experience with developing infrastructure solutions as code (IAC)
- Experience in DevOps practices (Azure DevOps pipeline creation and maintenance is preferred)
- Practical experience in incident management and supporting developers to be able to make the most out of the platform they use
- Experience working in an agile environment
- Strong communication skills. You can explain solutions and their pros and cons in both a business and technical context
- Experience in optimising costs for cloud solutions. Experience with Azure Functions, Azure App Service and API Management.

Nice to have:

- Kubernetes experience
- DevSecOps experience
- DataOps experience
- PySpark / SparkSQL experience
- Experience with tools like Sparx, SQL Developer, Confluence, Jira, GitHub

Relevant certifications:

- AZ-400 (DevOps Engineer Expert) Certification
- AZ-104 (Microsoft Azure Administrator) Certification
- Terraform Associate (003)
- Databricks Platform Administrator

What do we offer?

- A dynamic, international and challenging work environment
- Training and support to reach your full potential including the opportunity for continuous professional development
- Attractive terms and conditions, including competitive salary, pension package and a range of flexible benefits and rewards
- Challenging tasks with individual development and training opportunities

Equal opportunities for all

The success of our organisation stands with the quality of our people and the ideas they have. Insights and innovative solutions for our customers are the result of an interplay of cultures, knowledge and experience. That is why diversity is extremely important to Atradius. To ensure that all colleagues within Atradius can develop their qualities, we promote an inclusive culture in which everyone feels involved and valued. We encourage and welcome everyone to apply to our positions.
