

Senior Software Engineer – Observability Focus

About Atradius:

Atradius is a global provider of credit insurance, Surety, Collections and business information services, with a strategic presence in over 50 countries. The products offered by Atradius protect companies around the world against the default risks associated with selling goods and services on credit. Atradius is a member of Grupo Catalana Occidente (GCO.MC), one of the largest insurers in Spain and one of the largest credit insurers in the world. Learn more at <https://group.atradius.com>.

Our request:

Atradius IT is building a **Platform Engineering capability** to better serve our internal engineering teams. As part of this, we are delivering an **internal SDK and a suite of standardized libraries** for Java Spring Boot applications—designed to solve common concerns in a consistent, scalable way. One of the concerns we handle is **Observability**. We're looking for an experienced Spring Boot engineer with a strong understanding of the Observability space to help shape and implement this capability.

Office location is **Amsterdam, Cardiff or Madrid**.

Core tasks:

- Design and implement production ready services with the help of Spring Boot & Java
- Integrate with large databases, REST APIs, security components & observability solutions
- Collaborate with other software development teams, architects and system administrators to support them as they integrate existing applications with our libraries
- Provide technical support and resolve incidents related to our services
- Own and maintain clear, accessible documentation for internal users
- Actively contribute to our internal developer experience by promoting best practices and shared standards

Knowledge, skills and experience:

- Proven experience as a Senior Software engineer delivering Spring Boot solutions within an enterprise environment
- Strong knowledge of observability standards and tools, particularly OpenTelemetry, the Elastic Common Schema (ECS), the Elastic (ELK) stack, and Micrometer for metrics instrumentation
- Hands-on experience implementing secure APIs and user access controls using Spring Security
- Knowledge of Azure
- Ability to take ownership and to work autonomously within an end-to-end perspective
- Strong communication skills, solution driven and highly motivated
- Proactive attitude, co-operative approach and willingness to work in a team
- Excellent language skills in English, other languages are an advantage
- Bachelor or Master in Mathematics, Economics, Computer Science, Information Management or Statistics or equivalent work experience.

What we offer

- A dynamic, international and challenging work environment
- Hybrid position, **1 d/w office**
- Training and support to reach your full potential including the opportunity for continuous professional development
- Attractive terms and conditions, including competitive salary, pension package and a range of flexible benefits and rewards
- Individual development and training opportunities

At Atradius, we believe in personal development and the Growth Mindset. Our Culture is based on teamwork, reliable accountability, constantly improving and unrivalled service. Read on more on

Equal opportunities for all

The success of our organisation stands with the quality of our people and the ideas they have. Insights and innovative solutions for our customers are the result of an interplay of cultures, knowledge and experience. That is why diversity is extremely important to Atradius. To ensure that all colleagues within Atradius can develop their qualities, we promote an inclusive culture in which everyone feels involved and valued. We encourage and welcome everyone to apply to our positions.
