

Senior Platform Engineer

About Atradius:

Atradius is a global provider of credit insurance, Surety, Collections and business information services, with a strategic presence in over 50 countries. The products offered by Atradius protect companies around the world against the default risks associated with selling goods and services on credit. Atradius is a member of Grupo Catalana Occidente (GCO.MC), one of the largest insurers in Spain and one of the largest credit insurers in the world. Learn more at <https://group.atradius.com>.

Our Request:

Atradius ITS is building a **Platform Engineering capability** to better serve our internal software development teams. As part of this initiative, we aim to simplify and standardize interactions with our Kubernetes environments.

This work is part of a broader shift to improve **developer experience**, accelerate delivery, and standardize across the organization. We are looking for a **seasoned Kubernetes expert** to lead the development of abstractions, templates and tooling that will make it easier and safer for our development teams to deploy and manage their applications

Office location is **Amsterdam, Cardiff or Madrid**.

Core Tasks:

As a Senior Engineer in the Platform Engineering team, you will:

- Design, build, and maintain robust, user-friendly abstractions and self-service tools that simplify Kubernetes usage for development teams.
- Develop and promote best practices and standardized templates for Helm chart creation, ensuring sensible defaults and secure configurations.
- Implement and champion secure and easy-to-use solutions for secrets management within Kubernetes.
- Collaborate closely with software development teams, architects, and operations teams to understand their requirements, gather feedback, and drive adoption of platform improvements.
- Provide expert-level technical guidance, support, and training to development teams on Kubernetes, Helm, CI/CD best practices, and our new platform abstractions.
- Own and maintain clear, accessible documentation, tutorials, and examples for the tools and services you build.
- Actively contribute to enhancing our internal developer experience by advocating for and implementing best practices, automation, and shared standards in the cloud-native space.
- Automate deployments to Kubernetes.

Knowledge, Skills, and Experience:

- Proven experience as a Senior Platform Engineer, Senior Software Engineer, or similar role with a strong focus on Kubernetes in an enterprise setting.
- Deep understanding of Kubernetes architecture and core concepts (e.g., Pods, Services, Deployments, Ingress, ConfigMaps, Secrets, RBAC, Network Policies).
- Extensive hands-on experience with managed Kubernetes platforms, specifically OpenShift and Azure Kubernetes Service (AKS).
- Expertise in Helm, including chart development, templating, best practices for structuring charts, managing dependencies, and defining overrideable values.
- Strong knowledge of secrets management strategies and tools in Kubernetes (e.g., Kubernetes Secrets, Azure Key Vault integration).
- Demonstrable experience in designing and building developer-centric tools, APIs, or platform abstractions.
- Solid understanding of CI/CD principles and experience with relevant tools to automate application delivery to Kubernetes.

- Proficiency with containerization technologies (Docker) and best practices for creating secure and optimized container images.
- Experience with Microsoft Azure cloud services.
- Ability to take ownership and drive initiatives from concept to production with an end-to-end perspective.
- Excellent command of English (both written and spoken); proficiency in Spanish is an advantage.
- Bachelor's or Master's degree in Computer Science, Information Management, a related technical field, or equivalent practical experience.

What we offer

- A dynamic, international and challenging work environment
- Hybrid work **1 d/w in our offices**
- Training and support to reach your full potential including the opportunity for continuous professional development
- Attractive terms and conditions, including competitive salary, pension package and a range of flexible benefits and rewards
- Individual development and training opportunities

At Atradius, we believe in personal development and the Growth Mindset. Our Culture is based on teamwork, reliable accountability, constantly improving and unrivalled service. Read on more on our Career site: <https://careers.atradius.com/en/careers>.

Equal opportunities for all

The success of our organisation stands with the quality of our people and the ideas they have. Insights and innovative solutions for our customers are the result of an interplay of cultures, knowledge and experience. That is why diversity is extremely important to Atradius. To ensure that all colleagues within Atradius can develop their qualities, we promote an inclusive culture in which everyone feels involved and valued. We encourage and welcome everyone to apply to our positions.
